

**MSA Moose Jaw Summer Session**  
**Parade Information Regarding Helmet Use**

In Saskatchewan, as a matter of Law, certain restrictions apply to the operation of All Terrain Vehicles even in a parade situation.

While the issue is a bit more complex than I can share here the general rule is;

*If the vehicle is **designed for off-road use and has tracks of wheels in contact with the ground** it is considered an All-Terrain Vehicle. As such, an approved (DOT, CSA) helmet and eye protection is required. A valid driver's licence and a minimum of \$200,000 (CAN\$) liability insurance is also required. Most, if not all, Shrine insurance policies would cover this off.*

*Certain mini-bikes are also covered but are size dependent. Vehicles like motorbikes, dirt bikes or the like are exempt because they are able to be registered to be driven on-road.*

The big thing to keep in mind is the definition; **was this vehicle, regardless of it's current use, originally designed for off-road travel?** If the answer is "Yes" then helmet and goggles, etc apply.

Please contact me directly, with photos of the concerned vehicle, if you have any questions. My email is [chiefofstaff@wawashriners.org](mailto:chiefofstaff@wawashriners.org)

Happy parading!
